## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. Applicant is respectfully requested to provide the date (at least the year) for the references AM and AN cited in FORM PTO -1449 filed on 6/18/04.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recitation of "generating ... data blocks" recited in claim 1, line 8 is vague because it appears that it does not provide any useful purpose since the result of that step is not used by any other steps.

### ***Double Patenting***

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422

Art Unit: 2611

F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-5 and 9 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-3, 6 and 11 of U.S. Patent No. 6,707,864. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1-3, 6 and 11 of U.S. Patent No. 6,707,864 cover and encompass the limitations of claims 1-5 and 9 of the instant application. Moreover, it is well settled that the omission of an element and its function is an obvious expedient if the remaining elements perform the same function as before. *In re Karlson*, 136 USPQ 184 (CCPA 1963).

The corresponding of claims are as follow: claim 1 of U.S. Patent No. 6,707,864 covers claims 1 and 2 of instant application; claim 2 of U.S. Patent No. 6,707,864 covers claim 3 of instant application; claim 3 of U.S. Patent No. 6,707,864 covers claim 4 of instant application; claim 6 of U.S. Patent No. 6,707,864 covers claim 5 of instant application; and claim 11 of U.S. Patent No. 6,707,864 covers claim 9 of instant application.

***Allowable Subject Matter***

6. Claims 6-8 and 10-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References Davis et al (US 6,091,361), Michels et al (US 6,226,321), Yousef (US 2005/0041760), De et al (US 7,133,412) are cited because they are pertinent to the STTD communication system.
